SUMMARY

React Frontend Developer with hands-on freelance and internship experience shipping production web apps. Comfortable owning a feature end-to-end — from Figma to deployed component. Strong in React Hooks, Tailwind CSS, REST API integration, and Firebase. Built and launched a live client website currently serving real customers, and led UI component work during a startup internship.

EXPERIENCE

Klyros Craft — Frontend Developer (Freelance)

Dec 2025 – Present

React · Vite · Tailwind CSS · TypeScript · Framer Motion · Vercel · Figma

- Delivered 3+ client websites from Figma designs to production on Vercel — all fully responsive with zero layout bugs reported.
- Cut estimated page load time by ~40% through image optimisation and component-level code splitting.
- Built a reusable component library shared across projects, reducing per-page build time significantly.
- Maintained deployed apps post-launch: custom domains, SSL configuration, and client bug fixes within 24 hours.
- Debugged and resolved cross-browser inconsistencies across Chrome, Firefox, and Safari on every project.

LarkLabs.ai — SDE Intern

Sep 2025 – Nov 2025

React · Material UI · Tailwind CSS · REST APIs · Git · Agile

- Built a reusable UI component library that was adopted into the company's core frontend design system.
- Integrated 5+ REST API endpoints with proper loading, error, and empty state handling — reducing UI bugs in those flows.
- Refactored the frontend folder structure, improving component reusability and making onboarding faster for new devs.
- Participated in weekly Agile sprints, daily standups, and peer code reviews — shipped every assigned ticket on time.

PROJECTS

Lulu Furniture — Client Website

Live: lulufurniture.in GitHub: [Lulu-Furniture](https://github.com/Lulu-Furniture)

React · Tailwind CSS · Vite · Vercel

- Built and deployed a live production website for a real furniture business — actively serving customers since launch.
- Designed and implemented mobile-first layouts with reusable React components across all pages.
- Reduced estimated page load time by ~35% through image compression and lazy loading optimisations.
- Configured custom domain, SSL, and Vercel deployment pipeline — zero downtime since go-live.

Qwest — Task Manager

Live: qwest.vercel.app GitHub: [Qwest](https://github.com/Qwest)

React · Tailwind CSS · Firebase Auth · Firestore · Lucide React

- Built a full-stack task manager with Firebase email/password auth — tasks are user-scoped and persist across sessions.
- Implemented real-time Firestore sync using onSnapshot — task updates reflect instantly without page refresh.
- Secured data with Firestore rules ensuring users can only read and write their own tasks.
- Features task creation with date, time, and priority — plus edit, delete, complete, filter, and sort functionality.

Profina — Profile Editor Live: profina.vercel.app GitHub: [Profina](#)

React · Material UI · Framer Motion

- Built a shareable profile viewer and editor with controlled form inputs, validation, and Framer Motion animations.
- Structured all components for reuse and maintainability across desktop and mobile viewports.

SKILLS & TOOLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks: React (Hooks, Context API), React Router

Styling: Tailwind CSS, Material UI, Framer Motion, CSS/SCSS

Backend/DB: Firebase Auth, Firestore, REST APIs

Build Tools: Vite, Webpack

Tools: Git, GitHub, Figma, Postman, VS Code, Chrome DevTools

Deployment: Vercel (custom domain, SSL, CI/CD)

Core Skills: Component Architecture, Responsive Design, API Integration, Performance Optimisation

EDUCATION & CERTIFICATIONS

R.M.K Engineering College 2025

B.E. Computer Science Engineering

Full Stack Master Program — Besant Technologies 2025
